

OLDHAM AGENDA 21 PLAN

The Oldham Agenda 21 Plan is a document that summarises comments made by thousands of local people about what they value and what they would like to change about the Borough.

The document was compiled by the Oldham Borough Environment Forum in 1999 and it lays down suggested action plans for the future.

The document is a message from local people to the Council and other decision makers in the Borough.

It not only looks at local issues but also addresses more global concerns such as climate change and the depletion of the world's finite resources.

Concerns about litter were voiced by the largest majority of people with the need for more recycling facilities coming in as the fifth most desired improvement.

If you would like a copy of the Oldham Local Agenda 21 Plan contact the Environmental Policy team on 0161 770 3480.
